Profile

Driven by my passion for coding and problem-solving, I have recently made a transition to a new career path as a Web Developer. To equip myself with all the necessary skills and knowledge in full-stack web development, I undertook an intensive web development bootcamp at Ironhack. Now, my dedication lies in delivering high-quality web solutions, and I am committed to continuously expanding my expertise in this dynamic field!

Projects

- **TV Series Browser | BingeWatchr**
Client-Server web app. It allows users to browse, review, and rate TV shows. User authentication enables personalized experiences and full CRUD functionalities. It is built using React, Node.js and MongoDB.
- **Note Taking App | Iron-Notes**
Inspired by popular applications like Google Keep and Apple Notes, this web app provides a user-friendly interface to take your notes! It is built using Express.js, Node.js and MongoDB.
- **Game | Sudoku**
The timeless, classic Sudoku game built with vanilla JavaScript, HTML and CSS. Features different difficulty levels and an amazing algorithm to always generate new crazy puzzles!

Experience

RADIOLOGY TECHNOLOGIST

Brugnoni Group Sanità - Perugia, Italy
2018-2023

- Performed a wide range of radiographic procedures, including X-rays, CT scans and MRIs, ensuring accurate and high-quality imaging.
- Collaborated with radiologists and medical staff to assess and interpret imaging results, providing critical information for accurate diagnoses.
- Communicated effectively with patients, explaining procedures, addressing concerns, and ensuring their comfort throughout the imaging process.
